To Whom It May Concern:

I am writing in strong support of the academic promotion of Dr. Arthur Jurczyszyn to Associate Professor of Medicine at Jagiellonian University. I've had the privilege of knowing Dr. Jurczyszyn for the past 7 years, and I regard him as a highly gifted and compassionate clinician.

Based on his superb clinical skills and his academic productivity at Jagiellonian University, Arthur clearly fulfills the standards for this academic promotion. The respect by his fellow clinicians that Dr. Jurczyszyn has garnered extends to the international multiple myeloma field. He currently is a member of the International Myeloma Society Working Group, and he works closely with the other panel members. As a clinical investigator, Dr. Jurczyszyn has co-authored treatment abstracts and new treatment agents for multiple myeloma, which includes CNS Myeloma, elotuzumab and daratumumab.

Examples of Dr. Jurczyszyn's work include evaluating the role of the bone marrow micro environment in the pathogenesis of multiple myeloma, and also the role of the bone marrow micro environment in the pathogenesis of multiple myeloma.

Dr. Jurczyszyn has done an outstanding job in terms of his research, publication record and clinical service, and therefore has my highest recommendation for this academic position.

If you have any questions, please do not hesitate to contact me.

Sincerely yours,

A handwritten signature in blue ink, appearing to read "Ruben Niesvizky", written over a horizontal line.

Ruben Niesvizky, M.D.
