University Hospital

Department of Hematology

Kopernika 17,

31-501 Cracow, Poland

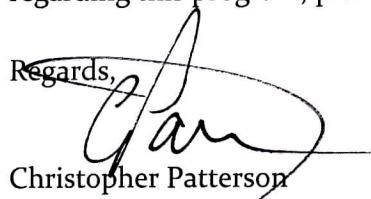

Dear Dr Jurczyszyn,

On behalf of Partners HealthCare, and our primary Oncology team in Waldenstrom's macroglobulinemia (WM), amyloidosis, and multiple myeloma (MM); Drs Steven Treon, Paul Richardson, Jacob Laubach, Jorge Castillo, and Nikhil Munshi, we were very delighted to have you participate and observe as a visiting professor during the week of April 28<sup>th</sup> through May 2<sup>nd</sup>, 2014 at the Dana Farber Cancer Institute, Boston, MA, USA.

Within this five (5) day program, we hoped that you had taken away many lessons and new ideas as well as potential cross-collaborative future projects with our colleagues based on our best current treatments available for cancer patients, the cutting-edge research and strong clinical care directives. In turn, your MM & WM view from a Polish based medical platform has provided excellent opinions, suggestions, and treatments in as well.

We hope that you enjoyed this educational event, and we look forward to strengthening our friendship between our two medical environments. Should you have any further questions regarding this program, please feel free to contact me.

Regards,

Christopher Patterson  
Administrative Director
